## EXPERIENCE

### Version.do, *full-stack developer*

October 2019 - PRESENT

Web application development using frontend frameworks such as Vue.js, Angular, Laravel among other technologies.

### JIRA EIRL, La Romana: *Full Stack web/mobile developer*

July 2019 - January 2020

In this company I started working as a mobile developer. Then I learned PHP and Laravel to help in the backend development. Also I developed an IOS version of their app and fixed several bugs on their main app
